Treatment	Service Type	Description	Price
Unibrow	Laser Hair Removal	Unibrow laser hair removal is a procedure that uses laser light beams to damage hair follicles and prevent future hair growth in the unibrow area. The laser light is absorbed by the hair's melanin, which is converted to heat and damages the hair follicles. This damage can inhibit or delay future hair growth.	ZAR 132.00
Upper Lip	Laser Hair Removal	Upper lip laser hair removal is a permanent hair removal technique that uses concentrated light energy pulses to damage hair follicles and prevent hair growth. The laser beam passes through the skin to the hair follicle, where the light energy is converted into thermal energy that destroys the follicle. The procedure can be less painful than other methods, doesn't damage the skin, and is cost and time effective	ZAR 220.00
Cheeks	Laser Hair Removal	Laser hair removal on the cheeks is a treatment that can permanently reduce unwanted facial hair without the harmful effects of shaving. It works by damaging the root of each hair follicle with pulses of light energy, called photothermolysis. The light is absorbed by the hair's pigment, or melanin, and converted to heat, which damages the follicle. The hair vaporizes, and after a full round of treatments, the hair will stop growing back.	ZAR 275.00
Sideburns	Laser Hair Removal	Sideburn laser hair removal is a permanent hair removal treatment that covers the area from the hairline to the jawline or below the ears. The treatment uses a cooled laser head to selectively destroy the hair root. During the treatment, you may feel pinpricks as the hair is destroyed. The treatment can take up to ten minutes, and the duration depends on the size of the area being treated.	ZAR 275.00
Chin	Laser Hair Removal	Laser hair removal is a medical procedure that uses a concentrated beam of light to remove unwanted hair. The beam is absorbed by the hair's pigment, which converts the light energy to heat. The heat damages the hair follicles, which inhibits or delays future hair growth.	ZAR 275.00
Neck (Front & Back)	Laser Hair Removal	Front neck and back neck hair removal is a treatment that can safely, effectively and permanently reduce the unwanted hair, without the harmful effects shaving can have on your skin. laser hair removal treatments work by targeting the dark pigment of hair right at the root and destroying it on contact.	ZAR 357.50
Full Face & Brows	Laser Hair Removal	Laser Hair Removal uses advanced laser light technology, which targets the melanin within the hair follicle. The laser light is then absorbed into the root of the hair, destroying the hair cells and stunting the regrowth of hair.	ZAR 880.00
Forehead	Laser Hair Removal	Laser Hair Removal uses advanced laser light technology, which targets the melanin within the hair follicle. The laser light is then absorbed into the root of the hair, destroying the hair cells and stunting the regrowth of hair.	ZAR 313.50
